Care & Cleaning

With latex or real-touch flowers, like our artificial orchids or rose stems, a damp cloth is usually the best method for cleaning dust off of artificial flowers. Just take a clean, damp cloth and wipe each flower carefully, making sure to get into all the small details, then leave them to dry.

- 1.For best results, periodic professional cleaning is recommended
- 2.Use only normal water when cleaning flowers, trees, plants to avoid shrinkage.
- 3.Avoid direct sunlight to prevent fading.
- 4.If spills occur, blot immediately, then clean with mild soap and cold water
- 5.Vacuum regularly WITHOUT the beater bar turned on.
